Weekly **MORBIDITY REPORT**

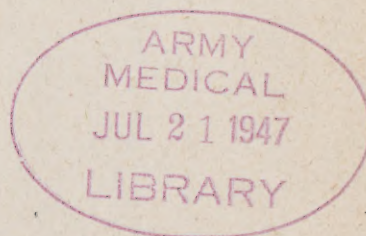

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 12 January 1946

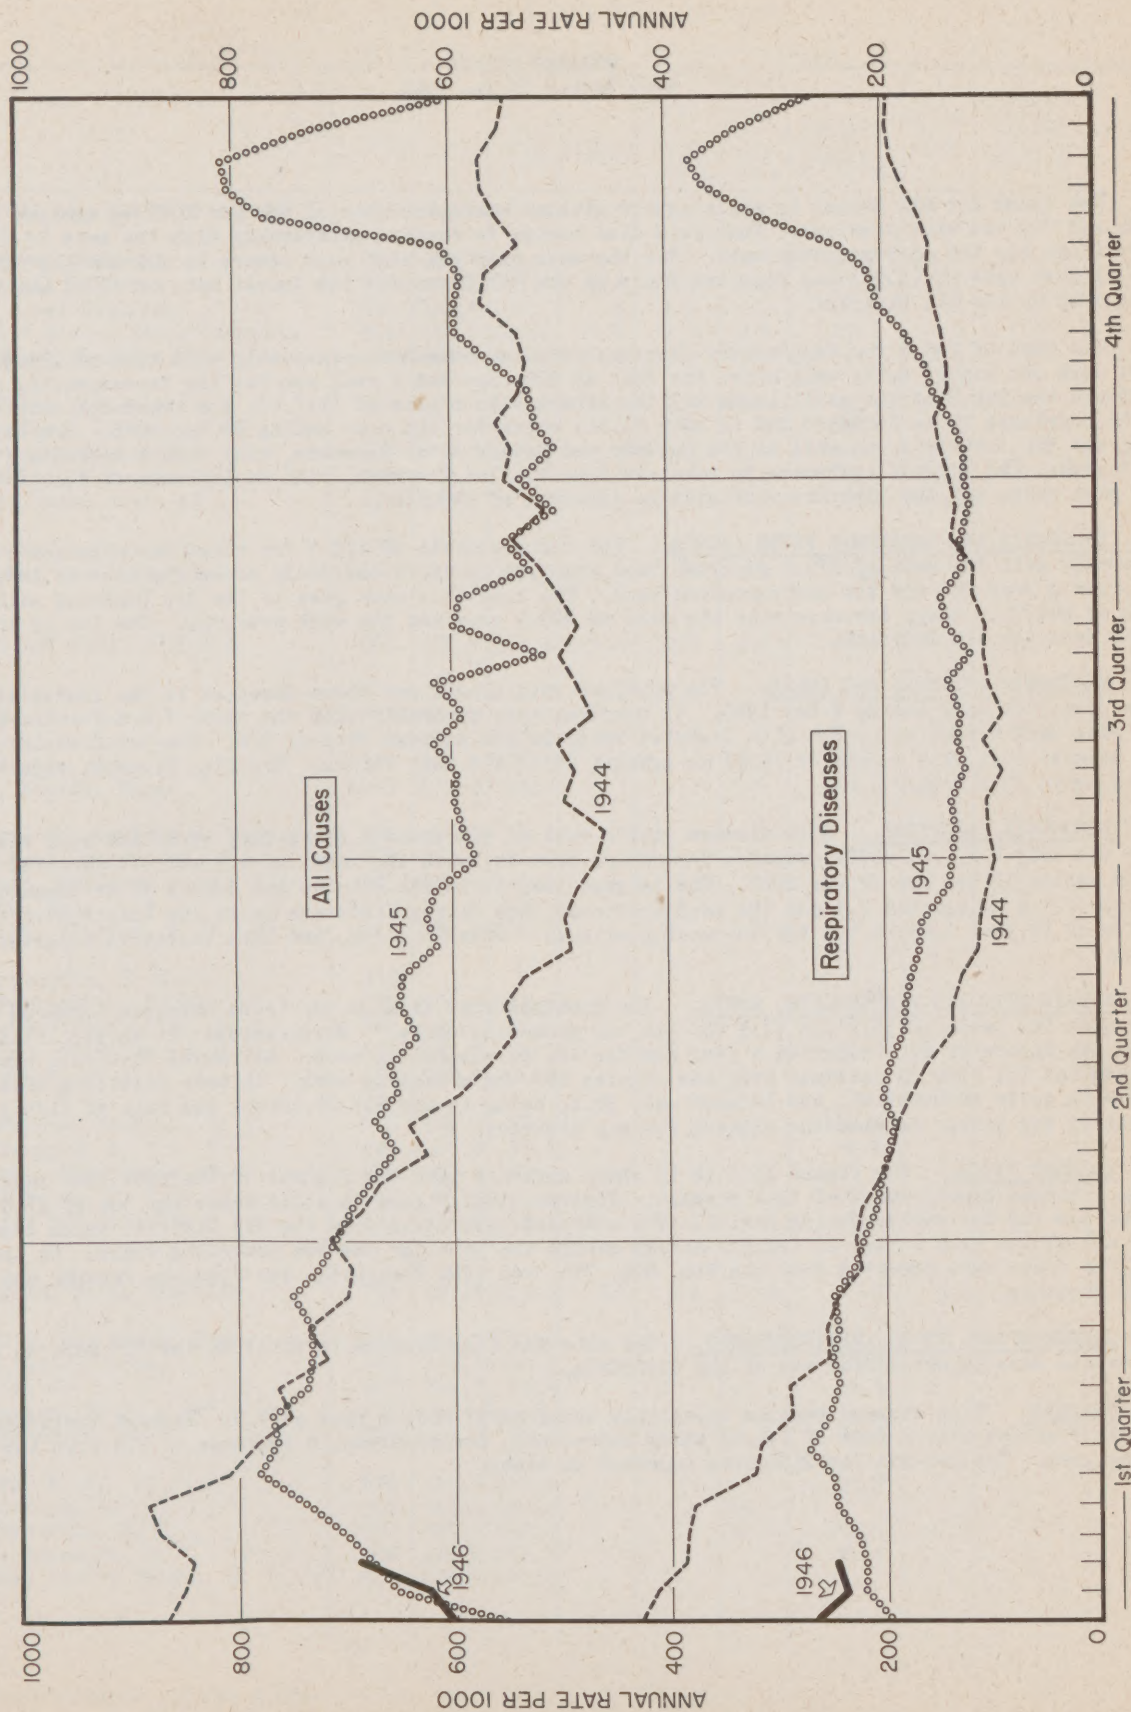

REPORT NO. 211

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944 AND 1945

CURRENT TRENDS
Week Ending 12 Jan 1946

The trend for All Causes is still upward with an admission rate of 686 per 1000 as against 624 last week and 602 the week previous. That rate also begins to compare unfavorably with the rate of 675 reported a year ago for the corresponding week. The increase over the past week occurs in all but the 4th District. The highest rate of (1093) was reported again by the 9th District; the lowest rate of (440) was reported this week by the 4th District.

The rate of 245.6 for Respiratory Diseases compares somewhat unfavorably with that of 239.3 for the past week and stands quite well above the rate of 220 reported a year ago for the corresponding period. Although the 9th District still leads all the others with a rate of (417.4), the trend for this district still continues to be downward and is back to its value for the week ending 22 Dec 1945. The 4th, 5th, 7th, and 9th Districts, as well as the Potomac and Severn River Commands, also show a decrease from the past week. The largest increases in rate are from the 3rd District, with an increase of (51.9) over the past week, and the 13th District with an increase of (46.9).

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 173.5 for these two diseases compares favorably with the rate of 179.0 reported last week but is still decidedly above the rate of 143.9 reported a year ago for the corresponding week. The lead this week goes to the 3rd District with a high of 266.9, a sharp increase over the rate of 226.9 reported the week previous. The low of 100.6 comes from the 7th District.

PNEUMONIA--FRONCHO AND LOBAR. The combined rate of 2.2 for these diseases is the lowest it has been since the week ending 8 Dec 1945. It compares very favorably with the rate of 4.0 for the corresponding week a year ago. The 11th District reported the highest rate of 3.4. The 3rd District has the largest drop with a rate of (3.1) as against (9.3) the week before. The 13th District reported no cases again this week.

PNEUMONIA, ATYPICAL. This disease with a rate of 4.0 shows a sharp jump over last week when its rate was only 2.5. It still compares favorably, however, with the rates of 4.3 and 4.4 reported for the weeks ending 15 Dec and 22 Dec 1945. The largest drop is in the Potomac and Severn River Commands with a rate of 0.8 as against 7.1 for the week previous. The largest increase is in the 11th District with a rate of 11.9 as against 4.5 for the week previous. The 4th, 7th, and 13th Districts reported no cases.

TONSILLITIS AND PHARYNGITIS, ACUTE. The combined rate of 66.0 for these diseases compares unfavorably with the rates of 55.2 and 53.5 for the two preceding weeks. Nevertheless, it is still slightly below the figure of 69.0 reported a year ago for the corresponding week. All Naval Districts except the 4th and 7th show an increase over the figures for the preceding week. In many districts this increase is quite substantial, the largest one, 36.1, being in the 9th District; the rate of (179.1) reported by the latter is also the highest for any district.

SCARLET FEVER. The figure 15.5 is in sharp contrast with the figures of the past four weeks and marks a sudden upward surge of that disease. However, that figure is still below the one of 27.0 reported a year ago for the corresponding period. The sharpest rise comes from the 9th District which towers over all others with a rate of (78.9), nearly double the rate for the two preceding weeks. On the other hand, no cases were reported from the 4th, 6th, 7th, and 13th Districts, nor from the Potomac and Severn River Commands.

CEREBROSPINAL FEVER, MENINGOCOCCIC. The rate for this disease is still at the "0" mark as no incidences were reported from any of the districts.

MEASLES. This disease remains relatively stationary, with a rate of 4.9. Highest incidence is in the 9th District with a rate of (14.0) which represents, nevertheless, a decrease of 2.3 from the preceding week. The 6th and 7th Districts reported no cases.
